SHIP PROGRESSION

The transition from sketches to painted ships, and finally to final art was challenging, but we were very happy with the final results. During this process, we explored three languages and considered what shapes would define each race or class of ship. Some ships with sharp angles tended to give the feeling of speed and aggression, while other ships with thicker frames felt slower and more heavily armored. We put a lot of consideration into how we designed our ships because we wanted players to be able to look at a ship and immediately have an idea of what this vessel might be like in combat.

SHIP PROGRESSION

Bad gameplay... buggy and glitchy..

World V map is empty... been wandering around and wondering what to do and where to go...

I think it's another incomplete business...

2V10. Eschatos is a 2d bullet hell shmup that fuses oldschool design fundamentals with newschool depth and polish. Unlike many modern shmups, which focus entirely on dodging and esoteric scoring mechanics, Eschatos prioritizes balancing offense and defense with its unique weapon and shield mechanic against unpredictable enemies who's quirky movement makes them as challenging to hit as they are to dodge against.

Players have the ability to shoot a long ranged and powerful straight shot, or a short range but blind-spot covering wide shot. Combining these two attacks allows you to create a shield that destroys bullets and enemies alike, but that must be recharged whilst not in use. Enemies come in waves, and the faster and the more completely you destroy these waves, the higher your score climbs and the faster the games pace accelerates.

Eschatos's weapons are double edged swords. Fire straight too much, and enemies will charge you from the side. Cover your sides for too long with the wide shot, and long range attackers will litter the screen with bullets. The shield itself is as much a weapon as it is protection, not only blocking bullets but allowing you to thrillingly charge straight through enemy attacks to more effectively shoot them, or even ram them. Using it too much however, will result in enemies piling up and overwhelming the player.

Eschatos's unique weapon balance, varied and unpredictable enemies (who's attacks and positions are frequently semi randomized, to encourage fun improvisation and nery reaction), endearing and innocent sounding soundtrack, rapid pace, and deep scoring system make it a game brimming with personality and fusing the best of both worlds from classic shmups and modern bullet hell. It's one of my top 5 favorite shmups of all time, and I recommend to it to anyone and everyone who likes 2d games.. What is this? \$1 for 12 pics unlocked in 5 minutes?. 6V10!

Fun game and very relaxing. The artwork in this game looks really nice. Would recommend to anyone who enjoys doing jigsaw puzzles.. I mean... It's decent. Got it for less than \$4 so whatever. This game is not for the "average" game player. I love this game, however!!! I've written a longer review for this game on the version with the DLC included.

This is basically the same game but I assume the DLC has a few more quests.

However...

This is a fun game where your partwise human character is kinda supposed to do the typical "save the world" thing.

It is fully voice acted (except your own character who doesn't like to talk).

In this game you'll have to do various quests and fight some foes. The battles are done in words and lots of them are funny because they go very deep into "nerd culture" and stuff.

However you can check out my other review about the game if you want but I do definately recomend it. You can't do anything wrong for the cheap prize. And the game also let's you feel that there has lots of work been put into it.

Ah and one thing aside - it's an RPG game where you have stats and can buy equipment on stores.

But it's not to bad because you basically can finish the battles without having any equipment bought just by replying to the questions with the right answers.

If you liked that game you might also look for the 2nd game (which is called a 3rd game but that's a joke I assume)

the follow up game does not have voice acting but it\u00b4s very long and even better than this one but for a start you definately want to get this one as the game explains lots of lore to you in a good funny way.

I don\u00b4t recall how long it took me to finish the first game but I think it was more than 2 hours over all (also with sometimes failing in the word fights)

If you loved playing Final Fantasy, Legend of Zelda, or other such games on the early Nintendo systems you will love this.

There were always two things about particularly Final Fantasy type games that I didn't like as much (that I've heard plenty others complain about as well):

1. SO MANY RANDOM MONSTER BATTLES OH MY GOD. They are less common in this game and there's a Pokemon-esque item that keeps monsters away for a bit. Inexpensive to buy in the shop and makes my life so much better. Even better, once you've played a bit, it gets BETTER. Eventually you will receive an item that allows you to turn off random encounters until you wanna turn them back on. Amazing. Perfect. Wonderful. Yes. This makes me particularly happy because there are a lot of fun hidden things in the big world and it's nice to be able to go looking for them without having to go through all those encounters!! (I would say, definitely turn encounters back on enough to level up, but it's amazing to have the choice.)

2. If you stop playing for too long and don't take copious notes while playing, you'll come back and have no idea what you were doing. Sojourner gives you a fun Telepathy Ring to contact the queen at any time to remind you about what you were trying to do. I haven't had this issue anyway because I have been binge-playing this because it is a load of fun and not so frustrating (thanks largely to the ability to turn off encounters when I don't feel like battling a load)... so I guess that's another feature that helps with that issue!

I'm at the very end of the game (I'm pretty sure) and have played for about 13.3 hours total (not in one go). I feel like there's a bit more to be done and this boss battle is kicking my butt, BUT when I get frustrated with that, I can go on a fun SOJOURN (heheh) to another place to train up, explore, do a side quest, and/or get more fun items.

I used to (and really still do) love those old RPGs, but they really did frustrate me so much. Sojourner fixes a lot of what frustrated me while lovingly poking fun at the flaws and quirks of old games. It has some really lovely messages put in, loads of fun extras to find, and a wonderful sense of humour. Plus it's only \$4.99, y'all! You can't beat that pricing! Seriously though, you guys should play this thing.. It would be fine on a hand held. Boring Candy Crush model. Not worth it unless sold for under a buck.. Awesome game! Really great thing to kill some time while doing nothing at work!. Sydney Stealth - Decent. Sydney Loud - COVER. YOUR. *****. EARS.

Sydney's Playermodel - Like a damn gorilla with skinny legs and arms. Like WTF! She is built like a tree swinging kangaroo.

Gun - Great! It's one of my new favorites!

Butterfly Knife - IS LESS CONCEALABLE THEN 70% OF EVERYTHING, AND IS THE SMALLEST OF ALL THE KNIVES?!?! WTF ARE YOU HIGH OVERKILL?!?!?!? AN ICE PICK IS MORE CONCEALABLE. FFS.

Perk Deck - Amazing for Tank Builds, I really enjoyed it, and replaced my Armorer perk deck for it!

3 out of 5 Acorns.. where is the costume ? cyberconnect 2 , you have to fix it. A small enjoyable game for short gaming sessions. I have never won in combat so i avoid it now, and it makes no difference to the overall playability.. was good, could have been longer.. Extremely underwhelming. You literally just get the tiles shown in the picture. Unless that just happens to be EXACTLY what you're looking for, I wouldn't recommend it.. Dragon

Riding A Hover Board

...100 of them.
